香港大學
THE UNIVERSITY OF HONG KONG

Master of Science in Environmental Management

環境管理理學碩士

1-Year Full-time / 2-Year Part-time Mode

The Master of Science in Environmental Management is an inter-faculty multi-disciplinary coursework programme which aims to provide comprehensive training in the field of environmental management, and address the major environmental problems and their social, legal and economic contexts. The curriculum draws on inputs from a broad range of subject areas, including ecology and environmental science, policy and law, economics, green technology, conservation and sustainable development. The programme started in 1989 and, to date, more than 600 graduates are now pursuing successful careers in government departments, environmental consultancies, NGOs and various industries.

Programme Highlights

- A **multi-disciplinary** programme with most teaching activities to be held on weekday evenings and occasionally on Saturdays.
- Jointly taught by the School of Biological Sciences, the Kadoorie Institute and the Departments of Professional Legal Education, Earth Sciences, Civil Engineering, and Mechanical Engineering of The University of Hong Kong, as well as local practitioners.
- **Flexible** mode of study
 - 1-year full-time study
 - 2-year part-time study
- Local and/or **overseas** field studies and visits related to environmental management.
- Full-time students have the opportunity to undertake an **Internship** programme under the supervision of experienced Environmental Practitioners.

Requirements

A Bachelor's degree with Honours in any field and a good command of English. Work experience is only essential for the part-time mode of the programme.
